

AGENDA

Fall Meetup 2024

September 25-26, 2024

Cable Center, University of Denver

Denver, Colorado

Wednesday, September 15

Wednesday, September 15

GIS Colorado Fall Training at GIS in the Rockies

Overview: The upcoming GIS in the Rockies Conference will feature three specialized trainings brought to you by GIS Colorado designed to empower participants with the latest tools and techniques in spatial data analysis.

Trainings will cover essential GIS concepts, hands-on experience with leading software, and practical applications in various fields. Whether you are new to GIS or looking to enhance your existing skills, this session aims to provide valuable insights and knowledge to help you harness the power of geospatial technology in your projects. Details on the specific content will be finalized closer to the conference date.

Training 1: ArcGIS Online for new users: Mapping, Visualization & App Configuration

Instructor: TBD, Esri

Description: This workshop will have a combination of hands-on exercises and demonstrations. You'll get experience creating ArcGIS web maps and applications in ArcGIS Online. We'll work with some of the recent cartographic tools for building eye-catching maps and discuss some of the data management and analytical capabilities in ArcGIS Online, such as managing data and creating feature layer views. We'll finish up with a review of the most recent options for build web applications to meet the needs of your organization. Come join us for a fun and practical workshop!

Room AAC 290 (capacity 114), Anderson Academic Commons, University of Denver, 2150 E Evans Ave, Denver, CO

Training 2: RD underground line locating

Instructor: Kaeli/Kelly, Frontier Precision

Description: Hands-on RD underground line locating and RD/GIS integration workshop.

Room MRH 217 (capacity 28), Margery Reed Hall, University of Denver, 2306 East Evans Avenue, Denver, CO

Training 3: Data Classification using NV5

Instructor: Matt Cross

Description: In this workshop, we will explore both traditional and contemporary approaches to imagery classification, using ENVI as our software to help attendees of the workshop understand the various approaches and which approach would be appropriate to specific geospatial applications.

Room SIE 5025 (capacity 60), Sie Complex, University of Denver, 2201 S Gaylord St, Denver, CO

Virtual Training

A live stream will not be available, but the session will be recorded.

Thursday, September 26

GIS Colorado Town Hall

The GIS in the Rockies Conference will feature a dedicated GIS Colorado Town Hall, bringing together GIS professionals from across the state to discuss key industry trends, challenges, and

opportunities. This interactive session will serve as a forum for networking, knowledge sharing, and collaborative problem-solving, focusing on the unique needs and goals of GIS practitioners in Colorado. Attendees will have the chance to contribute to discussions on professional development and the future direction of GIS in the region, fostering a stronger and more connected professional community.

Saeman Briefing Room, 3:30 PM

Virtual Meetup

The sessions will be recorded, but no live stream will be available.

Mappy Hour

Join us at 5:15 for the GIS in the Rockies social event!
